Education

Software Engineering

Haramaya University

2023 – 2027

Passionate Software Engineering student turning ideas into interactive, real-world software solutions. Experienced in Full-Stack Development, Mobile Applications, and Machine Learning, with a focus on building intuitive, scalable, and user-friendly applications. Adept at analyzing problems, designing efficient solutions, and implementing features that improve usability and performance, while continuously exploring new technologies to create software that delivers real value.

Skills

Frontend

- HTML5
- JavaScript
- Tailwind CSS
- Flutter

CSS3

React

Backend

- JavaScript Node.js
- PHP
- Python
- Java

Database

- MySQL
- MongoDB

Tools

Projects

- Haramaya University Entrepreneurship & Student Career Development Club

Developed a web-based system for the Haramaya University Entrepreneurship & Student Career Development Club to manage activities, members, and events, using React.js and Node.js
- currency-converter

Built a real-time currency converter using JavaScript and ExchangeRate-API, featuring 150+ currencies, responsive design, and interactive UI elements.
- Rect-Quiz

Engineered an interactive quiz platform using React.js and JSON Server, enabling real-time scoring, dynamic quizzes, and smooth user experience.
- Personel Portfolio

Showcased projects and skills through a React.js portfolio with interactive components, responsive layout, and seamless navigation for professional presentation.

Ethiopian Real Estate Marketplace Platform

Developed a scalable real estate web platform for property sales and rentals with user verification and admin approval using Node.js, Express.js, PostgreSQL, Prisma, TypeScript, and Git.

Languages

Afaan Oromoo — native, **Amharic** — good, **English** — fluent
